SKILLS

Figma & Framer
Wireframing & Prototyping
User Experience Design
User Flows & HCI
Mobile-first Design
Responsive Web Design
Cross-browser Compatibility
Design Systems & Tokens
Component-driven Development
Storybook Integration
Visual Hierarchy
Platform Guidelines
Front-end Engineering

SELECTED PROJECTS

Mini Island
3D Interactive Website

Arcline
Automotive Product Landing

Stackyard
Warehouse Operations App

Edmonton LRT Live
Real-time LRT Tracking App

SUMMARY

Accomplished UI/UX Designer and Engineer with a proven ability to enhance user engagement and streamline complex workflows. Expertise includes leading responsive design overhauls that increased active user engagement by 30%, optimizing user onboarding and navigation to improve completion rates by 40%, and architecting unified design systems that accelerated feature delivery by 25%. Possesses a strong foundation in frontend engineering, with experience in implementing real-time validations and improving rendering performance. Adept at translating user needs into intuitive and efficient digital experiences.

WORK EXPERIENCE

UI/UX Designer | Interactive Entertainment Studio, Taipei, Taiwan

10/2024 – 05/2026

- Led significant improvements to the visual hierarchy of high-traffic landing pages, utilizing data-informed layout adjustments and micro-interactions to boost mobile usability and achieve a 30% increase in active user engagement.
- Optimized intricate user onboarding processes and core navigation pathways through usability testing and analytics, successfully addressing key user pain points and elevating completion rates by 40%.
- Developed and scaled a cohesive Figma design system, directly linked to React component libraries and documented in Storybook using JSON design tokens, thereby reducing visual inconsistencies and accelerating product development by 25%.

UI/UX Engineer | AIBooksBank, Taipei, Taiwan

07/2023 – 05/2024

- Enhanced E-Invoice workflows by implementing real-time field validation, inline error messages, and recovery loops in React, resulting in a 30% reduction in user drop-off and cart abandonment during transactions.
- Spearheaded end-to-end design reviews incorporating high-fidelity Figma prototypes and reusable UI component specifications, which decreased technical integration friction by 20% among cross-functional engineering teams.
- Optimized CSS/DOM structure and improved cross-device rendering performance by 25% through the refactoring and coding of multi-step tax automation tools using progressive disclosure input flows.

Freelance Web Developer | Self-Employed, Toronto, Canada

09/2020 – 08/2021

- Spearheaded end-to-end design and delivery, utilizing user journey mapping and interactive Figma wireframes to achieve a 30% uplift in user engagement.

EDUCATION

George Brown College — Graduate Certificate, Toronto, Canada
09/2022 – 08/2023

University of Toronto Mississauga — Honours Bachelor of Science, Mississauga, Canada
09/2015 – 06/2022
